Case: 09-05529

Date: 3/18/09

Investigator: L. Reed 9659 / C. Gilmore 3928

Case History: Investigation

Jennifer Astle stated that her children had spent this past weekend with their grandfather. At some point during that visit her daughter told their grandfather that a friend of their mother's, Timothy Guilfooy, had touched them. They children had asked their grandfather not to tell their mother because they were going to tell her. The grandfather waited several days to give the children the opportunity to tell their mother they did not. The grandfather called Jennifer Astel this morning to inform her of what the children had told them. Ms. Astel then sat down with her children individually and asked each of them what happened. All three girls told her that Mr. Guilfooy had come to them when they were sleeping and they awoke to him rubbing their vaginal area and inserting a finger into their vagina. Ms. Astel called the police after learning this information. Mr. Guilfooy is a landlord to the home the Astel family is currently residing in as well as a family friend for several years. The girls told their mother that they didn't want to tell her because they didn't want to lose their home. Mr. Guilfooy resides in Missouri but is scheduled to come and visit the family in about two weeks.
